

Viejo Caldas Sugarcane Decaf

Colombia Green Coffee Beans |
Genuine Origin

This sweet, chocolaty decaf was sourced from smallholders across Caldas, Quindío, Risaralda, which collectively was known as El Viejo Caldas. This lot was decaffeinated in Colombia using ethyl acetate - an organic compound derived from sugar cane - to remove 97% of the caffeine from coffee beans. The process tends to leave a pleasantly sugary flavor.

Origin

Colombia

Region

Viejo Caldas

Producer

Various Smallholders

Processing

Sugarcane Decaffeination

Harvest Schedule

September - December

Variety

Caturra, Castillo, Colombia

Altitude (MASL)

1800-2100
