

Yirgacheffe Washed G2 TOP Lot

Ethiopia Green Coffee Beans | Genuine Origin

Beker works with smallholders on quality control and washed processing, adding value to the green coffee directly in Yirgacheffe and thus bringing jobs and extra income to people in the area. They also pay premiums and bonuses for every kilogram of coffee, incentivizing farmers with timely and equitable remuneration for their work. The proceeds from each harvest season are critical to families in Yirgacheffe, where money is scarce during the winter months.

Yirgacheffe is a coffee region that needs little introduction. With a mild climate that experiences a lot of rainfall, Yirgacheffe's high altitudes produce fruit-forward, sweet coffees that are prized among coffee drinkers around the world. Ancient coffee varieties dominate the smallholder coffee gardens that are tended by farmers who cultivate food crops to maximize the potential of this region's fertile soil.

Coffee from Yirgacheffe plays an integral role on the broader scale of Ethiopia's economy, bringing in foreign currency and fueling jobs in the coffee industry and beyond. This G2 Top Lot was sourced in partnership with Beker Exports, an export company with a coffee farm and processing site in Yirgacheffe that oversees incoming cherry from their own farm and neighboring smallholders in the Gedeo zone.

Origin

Ethiopia

Region

Yirgacheffe, SNNPR

Producer

Beker Coffee Exports, Various smallholders
