

Cajamarca Chasqui GI SHB/EP

Peru Green Coffee Beans | Genuine Origin

The chasquis were the messengers of the Inca empire — the fittest and most highly trained individuals; the best of the best. They would not only run messages across great distances and topographies, but helped to keep order.

Our Chasqui coffee is a blend of Peru coffees that, like its namesake, are the best of the best. Coffee cherries were harvested during the June - October harvest. The cherries were machine cleaned and processed. After the coffee was dried it was sorted by color and density to ensure that only the best beans remained.

The Center Regions used to be the largest, in terms of coffee volume, but that dropped dramatically after the leaf rust crisis in 2013. Since the crisis, San Martín and Cajamarca have been expanding again, in both productivity and new planted areas.

Origin

Peru

Region

San Ignacio, Cajamarca

Producer

Various smallholders,
Prodelsur

Processing

Washed

Harvest Schedule

June - September

Variety

Caturra, Bourbon, Typica,
Pache, Catimor

Altitude (MASL)

1200-1750
