Coffee Background

The Ngomano Coffee Factory is located in Machakos, a county with a rich heritage, fertile agricultural land, and the first capital city of Kenya before the capital was moved to Nairobi in 1899. At around 1,700-1,800masl, the red volcanic soil here supplies nutrition to mango, avocado, and maize crops, in addition to coffee.

The bright acidity of this coffee comes with a medium body, rounding out a juicy cup of tropical fruit with lemon and lime flavors and cacao nib finish.

Kenya green coffee beans are celebrated for bold, fruit-forward flavors that pack a punch in complex acidity. SL-28 and SL-34 are two of the most well-known varieties grown here, developed by Scott Agricultural Laboratories in the 1930s for drought resistance, exceptional cup quality, and large yield at high altitudes. After a coffee berry disease (CBD) epidemic in 1968, the CBD-immune Ruiru-11 varietal was developed and quickly adopted throughout the country.
