Swiss Water Decaf  
Process

### **HARVEST SCHEDULE**

July - September

### **VARIETY**

Mundo Novo, Catuai Red  
and Yellow, Topazio,  
Catucaí, Acaia

### **ALTITUDE (MASL)**

1200

## Coffee Background

When someone switches to decaf, it's clear that there's an attachment to the flavor of coffee that they can never give up. Now, it's easier than ever to have delicious caffeine-free coffee with all the characteristics of beloved origin terroirs. With constant innovations and improvements in decaf processing methods decaf drinkers can enjoy their coffee without sacrificing quality or flavor experience.

That means a natural process Brazilian coffee like this one from Minas Gerais can shine, even as a decaf. Roasters will detect flavor notes like cocoa powder and nuttiness, with a mild citrus acidity and black tea finish.

Minas Gerais alone produces more coffee as a region than any other country in the world. At around 30 million 60-kg bags per year, this region in Brazil accounts for nearly half of country's total coffee production. It doesn't get more quintessentially Brazilian than this, and now it's available in decaf, too.
