February - April

VARIETY

Dega, Kurame, 74110

ALTITUDE (MASL)

1900 - 2300

Coffee Background

Organic Guji Dimtu Tora G1 Natural is a vibrant and aromatic coffee sourced from the Dimtu Tora kebele in the Hambela Wamena woreda, located in the Guji zone in Oromia, Ethiopia. This coffee comes to us from Azeb Tadesse and was processed at the Dimtu Tora coffee processing station, a mill established in 2022. The coffee was grown at altitudes ranging from 1900 to 2300 masl, contributing to its complex flavor profile.

This coffee is certified Organic, reflecting sustainable and environmentally conscious farming practices. The farming system integrates shade trees such as Enset, Albizia, Acacia, Militia, and Polyscias, supporting agroforestry and biodiversity. The varieties include Dega, Kurame, and 74110, grown in rich volcanic soil.

The Guji zone is renowned for its high-quality coffee and rich cultural heritage. Hambela Wamena, where Dimtu Tora is located, borders Kercha, Gedeo (SNNP), Shakiso, and Uruga woredas. The region's elevation and climate create ideal conditions for coffee cultivation.

Smallholder farmers play a vital role in the coffee supply chain, contributing to the area's reputation for producing exceptional organic coffees.
